

Show Equipment Preparation Checklist

Name: _____

Date: _____

The purpose of this checklist is to make sure all equipment is properly prepared and checked for a show. This checklist does not include checks for confirming a script is properly loaded and running; for that, see the 18R2 Scripted Dry Run Checklist. Perform a basic physical inspection of every unit for any obvious damage.

Handheld Remotes

Enter how many of each remote and confirm the items below.

# 18R		# 18R2		# Deadman	
Firmware Version		Battery Levels (P1-9)		Backup AA batteries	

- | | | |
|--|---|--|
| <input type="checkbox"/> SMPTE present | <input type="checkbox"/> Control Panel present | <input type="checkbox"/> Booster / cable present |
| <input type="checkbox"/> Keys / antennas for each unit | <input type="checkbox"/> Backup AA batteries packed | <input type="checkbox"/> Physical inspection – no damage |

Notes

Modules

Enter how many of each module and confirm the items below. Confirm all units are in sync (cobrafiringsystems.com/sync).

# 18M		# 36M		# 72M		# 6M	
-------	--	-------	--	-------	--	------	--

Firmware Version		Battery Levels (1P9, 2P9)	
------------------	--	---------------------------	--

- | | | |
|--|---|--|
| <input type="checkbox"/> Keys / antennas present | <input type="checkbox"/> Backup 9V batteries packed | <input type="checkbox"/> All units synced to show remote |
| <input type="checkbox"/> Firmware matches across units | <input type="checkbox"/> Battery levels confirmed | <input type="checkbox"/> Physical inspection – no damage |

Notes

Additional Equipment

List any additional equipment (slats, cables, signal accessories, etc.). Inspect each unit. For powered items such as boosters, confirm the unit powers on and has fresh batteries.
